

Import Bingo!

Sometimes, things around us come from unexpected places. Look around your home—at clothes, food packages, anything with a label—and see where your stuff came from. Some items are made in other states (or distributed by companies in other states) and some come from other countries. Lots of the items in your home have traveled across an ocean to get to you!

See if you can find five in a row. Then Google where these places are, and how far they are from Salem, Virginia!
